

Civic Engagement
with
**Sean E
Avery**

Explore more of Sean E Avery's work online. Check out Sean's [book catalogue](#) and his [learning resources](#) via his website.

Invite students to become citizen scientists and undertake a pollinator walk around the school or their backyard. Encourage students to look closely and record what creatures they find.

Watch Sean read a chapter from *Friendly Bee and Friends*, as well as lead a drawing session. Visit [Scholastic Books](#) for detailed teacher notes to accompany *Friendly Bee and Friends*.

Support students to create their own picture books with Sean's step by step [how-to lesson series](#).

Invite students to view some of Sean's [incredible sculptures](#). Using recycled materials create a sculpture or artwork to invite conversations with others about the importance of bees.

As a class, design and create a pollinator friendly planter box or garden. Think about local native plants to include. Be sure to add bee friendly water sources such as a shallow dish lined with small rocks.

Explore even more ideas to help bees and other pollinators thrive using our [Help Your Hive Thrive](#) matrix of activities.

Support students to develop their own *Friendly Bee* comics using this [template](#). Invite them to learn about different pollinators and incorporate some facts into their comics.
